By Günther Dauwen, Co-ordinator VRPN, Campus Vesta
- 15h35 **Presentation on VR for police solution 3: REFENSE**
By Ronny Tobler, CEO REFENSE (Switzerland)
- 16h05 **Q&A Questions and answers to the panellists**
- 16h30 **Exhibition visit with try-outs at stands of Ramrod, Hologate and Refense**
- 18h00 **Networking reception opened by Uwe Wehrstedt, organiser of GPEC®**

All registered participants will receive a set of documents in a nice glossy folder (leaflet VRPN/ VR training for Police a Provider overview/ Policy maker toolkit), they will have the possibility to do a try out in the GPEC stands of Ramrod, Hologate and Refense and they can take part in the reception free of charge but we do insist that participants would give feedback via a QR code. This will serve the network to grow and the VR companies to adapt their products to the needs of the end-users in the many LEAs working with VR.

The aim of the seminar to have each provider do a presentation in which they cover all the same elements allowing participating end-users and decision makers to more easily compare options for their LEA: -immersion, realism;-visual quality;-Body tracking; -stress measurement; -AAR; -scenario making; -weapons; -experience of the company with police training;-what has been the learning curve of the company on VR for police;-what should be improved in the upcoming time in our system;
